

RUNNING CONTROL EVENT No. 1.
Maximum number of points 15

Algorithm for conducting a "checkpoint" in the MOODLE educational environment, for each student there are three tasks, by the method of random distribution from a downloadable database of tasks (attached):

1. Glossary of terms: 2 terms -2 points;
2. Oral presentation (1 topic) –5 points;
3. Control questions for an interview - 2 questions - 8 points.

OBJECTIVE BASE

1. Glossary of terms

1. Production efficiency - comparison of production results and costs. An efficient state of the economy is considered when the needs of all members of society are most fully satisfied with given limited resources.
2. Accreditation (of health care institutions) is a process by which an authorized body (usually a nongovernmental organization) evaluates and confirms that an organization has achieved predetermined and published standards through an on-site independent external periodic peer review of the performance of such an organization. Accreditation standards are generally considered to be optimal and achievable and are designed to stimulate continual improvement in accredited organizations. Accreditation is often a voluntary process in which organizations choose to participate.

2. Topics for oral presentation:

1. The healthcare system in the Russian Federation, its main elements.

3. Test questions.

1. Characteristics of the sections of modern economic theory: microeconomics and macroeconomics.
2. Evolution of social needs and restructuring of health care.
