

**THE EVENT OF THE CURRENT CONTROLNO. 2.**  
**The maximum number of points is 20**

Algorithm for conducting a "control point" in the Moodle educational environment, three tasks are provided for each student, using a random distribution method from the uploaded task database (attached):

1. Test task 12 tests – 6 points;
2. Calculation tasks-1 task – 8 points;
3. Control questions-2 questions – 6 points.

**TASK DATABASES**

1. Test tasks:

25. How does the cost of a bed day by level of hospital specialization?

- a) in specialized departments, the cost of a bed day is higher than in General departments;
- b) does not depend;
- C) in specialized departments, the cost of a bed day is less than in General departments;
- d) in specialized departments and in General departments, the cost of a bed day is the same;
- e) in specialized and General departments, the cost of a bed day varies.

26. Expenses that can be directly attributed to certain types of medical services provided are:

- a) direct;
- b) indirect;
- C) auxiliary;
- d) variables;
- e) General.

27. what applies to direct expenses:

- a) salary of administrative and managerial personnel, utility and economic expenses;
- b) transportation costs;
- C) expenses for performing routine repairs.
- d) travel expenses;
- e) rent payments.

28. what is the name of the cost estimate of the labor and material resources used, which is made using the calculation:

- a) cost price;
- b) the price;
- into the tariff;
- d) profit;
- e) profitability.

29. What costs cannot be directly allocated to specific services:

- a) indirect;
- b) direct;
- C) gross;
- d) permanent;
- e) there is no correct answer.

30. The profit in the planned scope of services is:

- a) gross;
- b) economic;
- C) net;
- d) accounting;
- e) there is no correct answer.

## 2. Calculation tasks:

1. The number of employees in the institution is 800 people. In 2018, the economic losses associated with disability working was 2 475 000 rubles In 2019 (in connection with a reduction of incidence), the economic damage amounted to 2 140 500 RUB. The cost of treating sick workers in 2018-2019 amounted to 400 thousand rubles. Determine the amount of damage prevented (economic effect) and the cost-effectiveness of reducing the incidence of temporary disability.

## 3. Security questions

1. History of development and formation of health insurance systems in Russia and in the world.
2. Sources of funding for healthcare institutions.
